To be clear on a few items

• Main virtual conference uses a platform called engagez
• Talks are a mix of prerecorded materials and live action (ZOOM)
  • ZOOM links will become active shortly before all live introductions, presentations, panels, Q&As
• Cheat code:
  • You can open more than one window/tab in a browser at a time:
    • I.e., attend the sessions (watch presentation) AND be in a booth
    • You can’t login to multiple machines at one time
• Breaks and social events
  • Many of the breaks and our industrial exhibits reception will use a second platform called Remo (remo.co) as well as the Exhibit Hall
    • Visit tables with exhibitors, games (trivia contest!), social and technical tables with leaders, or just to have a side meeting
  • You will need to register and create a profile separately for this platform – we highly recommend doing this when you first enter the virtual meeting
    • We apologize for the extra step that’s being required
    • See later slides for instructions

Which table you’re seated at is random in the sense that you do not control which table you initially join.
Moving Within a Remo Building

Some tables will be named in the Exhibitor Building (supporters/exhibitors) and in the Social Building (named technical and fun topics). Exhibit staff and table leaders will be at these tables.
